Draw significantly more accurately: Learn how to use the precise features of pencil, when you do need to use them. Know when to use brush, solid, color, pattern, and gradient fills, how to set pen properties for texture, and how to use them with edge flow commands. (video: 1:22 min.) Create more sophisticated drawings: Automatically change the pen settings of pencil as you draw, making adjustments as you go. Edit the end points of pencil commands with edge flow and align with the drawing. (video: 1:45 min.) Protection from the Deleted Drafts in History: Add the feature that prevents you from accidentally deleting a previous drawing and losing all its work. The "keep-alive" switch toggles the feature on and off. (video: 2:30 min.) Locking with Snap and Object Selection: Draw more accurately. Instead of clicking and dragging for every line segment you create, quickly lock the object with the lock or lock command and the object will lock automatically when you reach the next line segment. (video: 1:26 min.) Open the Drawings and Project Files: Your personal draw set is now included with AutoCAD, allowing you to open, draw, and save drawings in one click.
