choice and hold it with your mouse cursor over the text to begin to change. Once you add a bit of text, you can choose one of the fonts you put on your sidebar to make your text look a bit different. Also, you can move these fonts around, choose from different fonts, and choose the typeface. **What it Does:**

The new Content-Aware Fill tool comes to the rescue of the boring banner ad — it will change the blank space of your photo with the content of the foreground. Now you can have a photo with that special something that makes you go, "Aww." However, the best part of things might be how easy it is to work on this big, complex task with just your phone or tablet and the tools that came along with the camera. And with numerous intuitive tools designed to make the camera process simple and intuitive, you can be ready to start editing in just a few seconds. 933d7f57e6
