Suggestions can be applied with a single click. Since Lightroom 3 is an organized set of suggestions that can be applied to all of the images in a database, suggestions can be transferred from other catalogs and applied intelligently. You can also search for keywords on images - which helps with sorting and finding specific images. The idea behind suggestions is that they can all be applied, so the work you are doing is cut-and-paste, and then you just save. The suggestions are applied in the background, so you can still work on your own images. Because Lightroom understood what it was doing, the setup was very easy to use. Of course, at least one of my uploads tried to modify all of the keywords in my database, resulting in a warning that it could not do that. I believe it was a CS6 bug. While smart filters, like the Liquify tool and Offset (an advanced variant of the Clone Stamp) do include a variety of presets, adjustments are still set globally with the Desaturate tool in the same manner as in CS6. Another option that does bear mentioning is the Combine tool, which allows you to blend or combine a number of images into one file. You can add a reflection and alter the color balance, adjust shadows and highlights, and even merge a HDR image, all with the included presets. Have a bunch of images acquired with different variations of the same settings? Combine them all by manually altering the clip board settings and you are done. I have to be honest, I think Photoshop will take a while to come out of its shell. But with the announcement of the Creative Cloud, I firmly believe that Photoshop CS6 is the software that will be the centerpiece of that launch. It does have a lot to offer, and I am confident that it will keep user's excited about it. This is important since you need all the users it can get to continue using and updating the tool. And finally, I am also quite impressed by the raw improvements that have been made with the new core engine. It takes many shortcuts, but the hard work of the team has definitely been worth it. I will try to get more detailed information about the update, hopefully in a couple of weeks.
